## User journey

A GESTURE BASED TOOL FOR STERILE BROWSING OF RADIOLOGY IMAGES

Team ID: PNT2022TMID51771

30 min

Difficulty Beginner

1 Phases

High-level steps your user needs to accomplish from start to finish

working of the system

Test the correctness of the output

2 Steps

Check whether the system is or not

Interface must be

friendliness

respect to the

of the image to Gestures

Tune the parameters if needed

**B** Feelings

feeling at the moment

System is ready to be used

Attractive

Gestures are displaying properly on the screen

Will the

captured

correctly?

according to

properly

accurate output

What if the misbehaves?

Confused about the camera quality

about the

Reliability

Will the system performs in bad lightings?

Anxious about the wrong predictions if

Predict the Correct image
